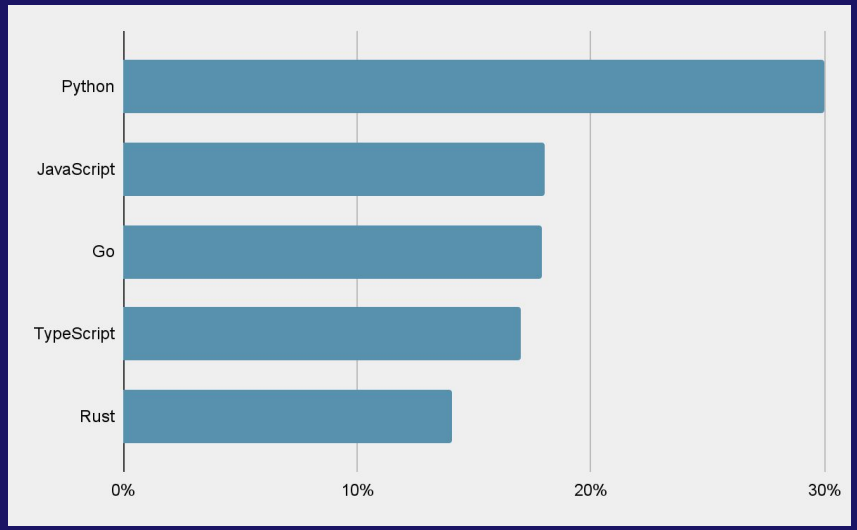
OVERVIEW

Beginning

Rust is statically-typed language designed for performance and safety
It is one of the most popular language
Rust is based in c++, because of the syntax
It was created in 2006 by Graydon Hoare

Most liked programming language



Data from 2021

$160,000

Rust medium salary

2,200,000

Active rust developers

02

Where it is used

49%

CLI TOOLS

38%

System Programming

Web development

Game development

03

Basic code

Code

```
fn main(){
    println!(“Hello world”);

}
```

Terminal:
Hello world

Fun facts

Rust is used in linux kernel

It doesn’t have garbage collector

Rust has a mascot - crab

Thanks for watching!
